

## Emerson Commercial & Residential Solutions

### **(Senior) Integrated Solutions Engineer (m/f/d)**

Do you want to work in an international development team focused on finding the best solutions for our customers?

We are looking for a (Senior) Integrated Solutions Engineer designing and developing Integrated Solutions relying on Emerson Climate Technologies' broad product range - compressors, flow controls and electronic controls - as a part of our *Europe Solution Center*.

If this sounds like the next challenge for you, then join our team!

#### **Your main responsibilities will be:**

- Develop integrated solutions relying on Emerson Climate Technologies' broad product range, compressors, flow controls and electronic controls. The resulting solutions rely on technologies ranging from mechanics to controls & diagnostics, fault detection and IoT.
- Analyze HVAC/R and energy systems theoretically and experimentally.
- Develop advanced tools for the organization.
- Develop new value proposition opportunities for customers & end-users jointly with customers, engineering, marketing, sales.

#### **Our ideal candidate:**

- Holds a PhD in Mechanical Engineering, Thermodynamics, Energy Systems or any closely related field.
- Has a solid experience in energy systems, including analysis, simulation and lab work.
- Has excellent communication and listening skills, good customer contact.
- Is fluent in spoken and written English. Additional European languages constitute an advantage.
- Is passionate about technology and solving problem or advancing progress through innovation.
- Is a team player who is driven to find the solution that responds to customers and users' underlying needs.
