

Copeland™ Mobile App

Compressor Replacement Quick Guide

- ### 1 Getting started

To get started, download & install the App

GET IT ON Google Play | Download on the App Store

Sign up & register using your email and personal details, choose the region, then use your user ID when you login
- ### 2 Compressor search

Search by scanning the barcode of the compressor nameplate, or search via the search bar by typing in the first three characters of the compressor model
- ### 3 Model selection

The app will then display several compressor models, with different technical conditions. To select the one you need, simply click on it.
- ### 4 Check compressor status

The display will then show you if the compressor is either Active (model available) or Inactive (model no longer available), which then redirects you to the equivalent replacement.
- ### 5 Check specifications

Check the technical specifications and view the service part listings of the selected compressor
- ### 6 Compare with replacement

Compare the selected product with the recommended replacement.
- ### 7 Find wholesaler

Type in your location and you will be automatically redirected to the closest wholesalers, based on geolocation. If you want to type in another location, the app will show you the results, based on your desired location.
- ### 8 Additional Info

Didn't find all the details you were looking for? Simply click on Select icon and you will be redirected to Emerson's largest database of compressor specifications.
- ### 9 Documents and drawings

View Application Guidelines, Manuals, Wiring Diagrams and more linked to the searched product
- ### 10 Troubleshooting

Efficient troubleshooting is an essential part of asset management, diagnosis, and repair. Find the right problems and solutions quicker. Answer the questions and the app will suggest the solution and next actions.
